Fact: If a home companion receives more than \$1,700 in wages, employers must withhold and pay FICA taxes on the wages of their household workers. Additionally, the employer is responsible for both state and federal unemployment.

Fact: If a home companion is injured, workers compensation insurance is not available and homeowners insurance will not cover the cost of the injured caregiver. Family assets are exposed.

Home Care Services, LLC provides home companionship which can be customized to meet the needs of your family. Whether someone requires 24-hour care or some portion thereof, Home Care Services, LLC reduces the stress of a family trying to provide this service.

Because Home Care Services, LLC hires the caregiver, workers compensation and unemployment insurance are provided, thus protecting family assets.
